### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kurt Rauschenbach on October 30, 2003.

The application has been amended as follows:

- Cancel Claims 9-31.

2. The following is an examiner's statement of reasons for allowance: Applicant's remarks distinguish between polarization-division multiplexing (PDM) and time-division multiplexing (TDM) as being different technologies where the advantage of PDM such as greater spectral efficiency, higher dispersion tolerance, and double the data capacity compared to non-PDM systems. Thus, as the claims were read and interpreted in light of the specification and Applicant's remarks, the prior art of record fails to specifically disclose a polarization-multiplexed optical data modulator device and method comprising a means of generating an optical clock signal having a train of optical pulses with a polarization state, a means for optically splitting the optical clock signal into a first and second by polarizations, a means for delaying the first signal, a means for rotating the first polarization state of first optical signal that is substantially orthogonal relative to

the second polarization of the second optical signal, a means for optically combining the first and second signals to generate the polarization-multiplexed optical clock signal, and a means for modulating the polarization-multiplexed optical clock signal with a data signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
